

ATTENTION to all Tri SUD CUSTOMERS:

Please INSULATE all your outside pipes. Do NOT leave faucets running or dripping during freezing weather.

Open cabinet doors to let heat under the sinks – this will prevent most faucets from freezing.

With everyone running and dripping faucets, it's like one gigantic leak over our whole water system. This will and does cause water outages during the freezing temperatures.

Please do your part to ensure all customers have access to running water during severe weather.

Thank you,

Tri SUD Management
