Effective November 1, 2021

Minimum Rate Increase for all Customers

Our 5/8" x 3/4" meter most commonly used for residential accounts is the base flow for one (1) meter. It provides for a certain amount of water flow we are required to have available to our customer. As the meter size increases, so does the output. In the past, the minimum charge for the larger meters has been based on a pricing scale, rather than the output of the meter. The chart below shows existing meter sizes and the "one meter equivalent" for the output of that meter. The minimum is being raised to one-half that of the recommended equivalency minimum cost on all meters over the base size. New prices are listed below:

<u>Meter Size</u>	<u>Meter Equivalent</u>	<u>New Monthly Minimum Price Based on ½ Equivalent</u>
5/8" x 3/4"	1	\$27.20
1"	2.5	\$34.00
1-1/2"	5	\$68.00
2"	8	\$108.80
3"	9	\$122.40
4" Turbine	30	\$408.00

Usage will remain \$5.75 per 1,000 gallons at this time

Thank you for your understanding as we work together to continue to provide clean water and a strong infrastructure to all our customers.

Aaron Gann
General Manager
